## Summary

My name is Anastasiia. As a rising star of web development, I am looking for any working experience in the field and consider both junior positions and internships. I am an inspired and quick learner with strong communication and problem solving skills.

From 2013 I've been working in IT, mainly occupied with creating technical documentation. Now I am studying full-stack web development at Business College Helsinki. I have already completed the following courses:

- HTML 5 (grade S)
- CSS 3 (grade S)
- Programming in JavaScript (grade S+)
- Node.js basics (grade S+)
- React basics (grade S)
- Software design and prototyping (grade S+)

During my free time I apply and perfect my knowledge in my personal projects (check my personal page at [www.monkeybusiness.space](http://www.monkeybusiness.space) and my GitHub account at <https://github.com/AnastasiiaAleksandrova>).
